

Blue-U Secure Business

Stage One:

The most significant advance you've ever had in the security of your organization... in one day!

In a single day we will:

- Establish a baseline position and plan
- Review policies & procedures for effectiveness and practicality
- Conduct a Physical site security assessment
- Identify and make recommendations to significantly improve preventative measures
- Conduct a 2-Hour live training course for staff - No limit on attendees
- Conduct a slow, walkthrough simulation exercise - Branch or Corporate

Even if you do nothing beyond Stage One, this single stage will do more to enhance your organizational security than anything you've ever done previously to secure physical and human assets.

Guaranteed! If you don't agree, you don't pay!
